The City of Los Angeles Environmental Affairs Department would like to congratulate the Air Resources Board on the proposed Policy Statement on Voluntary Early Actions to Reduce Greenhouse Gas Emissions. This statement is an important promise to all of us in the state that our actions to reduce greenhouse gas emissions prior to the adoption of regulatory requirements will be taken seriously and, to the extent possible, credited toward any future actions needed.

We ask that you clarify in the policy statement that the term "company" does and will include local government entities and other types of public and private organizations working to reduce greenhouse gas emissions, as we, too, may be required to report or reduce emissions in the future.

Thank you for your consideration of this comment. We at the City of Los Angeles look forward to working more closely with you on this critical program.

Sincerely,

Detrich B. Allen
General Manager
